

EXPERIENCE THE BUTLER DIFFERENCE.

Butler Manufacturing™ offers several competitive advantages that have enabled us to remain the leader in the building systems industry for more than 100 years. We call this The Butler Difference, and you'll find it in details such as—

Butler Builders—offering single-source responsibility and complete construction services. Find your local Butler Builder® at www.butlerbuilder.com.

High-performance products—such as acrylic-coated galvanized C/Z purlins and

girts, the unique MR-24° seam that virtually eliminates roof leaks, and structural and wall systems that integrate easily with conventional building materials.

Butler-Cote™ finish—Butler offers this superior full-strength Kynar 500® or Hylar 5000® fluoropolymer finish system as the standard exterior finish on all painted panels and trim.

Weathertightness warranties—available 25-year warranties for panel finish protection and weathertightness are a testament to the performance that a Butler® building system offers.

BUTLER® RELIGIOUS FACILITIES

A BUILDING WORTHY OF ITS PURPOSE

When a facility is designed for worship, celebration of life, and community outreach, the importance of making the right construction decisions cannot be overstated.

Creating a beautiful sanctuary is naturally a key consideration. But it isn't the only one. You must also evaluate your needs with regard to educational centers, recreational facilities, dining halls and large open meeting rooms.

Today, more and more building committees are finding that a Butler® building system addresses these issues better than any other option. In addition to enhancing worship and fellowship experiences, a Butler building system provides compelling advantages such as design freedom, faster construction, and lifecycle savings.

Take a moment to discover what The Butler Difference can do for you.

FLEXIBILITY TO SERVE YOUR NEEDS

Butler religious facilities offer unmatched flexibility. If you wish, your building can be designed without interior columns. Nothing will keep you from using the valuable space to its full potential. And if future expansion is in your plans, you'll find a Butler building system readily accommodates it. The unobstructed

interiors created by a Butler building system are ideal for sanctuaries, meeting rooms or recreational areas. Roof pitches can also vary to offer soaring open areas, perfect for worship centers. And by creating distinctive rooflines, you'll highlight the vibrant color of the metal roof to catch the admiring glances of outside passersby.

BEAUTY IS REFLECTED IN EVERY DETAIL

When you build with Butler, you can be confident you'll receive a beautiful facility that the entire congregation will be proud to call their own.

Exteriors of wood, brick, stone or glass are just as familiar to us as our attractive and economical metal wall systems. You can also incorporate a glass curtain wall system to create stunning beauty and offer a glimpse of the sanctuary inside.

A VIRTUALLY MAINTENANCE-FREE SOLUTION

No one wants to worry about constant maintenance. It's good to know Butler building systems have been tested by Butler research specialists and proven to perform in tens of thousands of applications around the world. For example, our MR-24®

standing-seam roof system has been used on over two billion square feet of buildings and can be warranted weathertight for up to 25 years—and it routinely outlives its warranty. You'll save every year on roof maintenance costs and headaches.

COST-EFFECTIVE CONSTRUCTION IS ASSURED

With a Butler building system, the structural frame, the roof and even the walls of your new building are designed by experienced Butler engineers. This saves you planning time and engineering design costs. And with our extensive capabilities, Butler can design for any budget.

Butler systems, designed for precision assembly without expensive field work and on-site modifications, allow for quicker construction times. In fact, your Butler Builder® can cut construction time up to 30% over ordinary construction methods. A design-build solution, which eliminates multiple parties and streamlines

the delivery process, can add further efficiencies. You will be able to move your congregation into their new building sooner—with lower initial construction costs and lifecycle costs.

INTEGRITY MEANS EVERYTHING

Butler is known for its design integrity in the building systems industry. We go to great lengths to assure that our buildings are certified to the highest design and manufacturing standards and comply with all applicable codes. You can also take comfort in knowing that all Butler products are thoroughly tested to assure consistently superior quality.

A BUILDER YOU CAN TRUST

Your Butler Builder is a construction professional who can handle every phase of your construction project. Only builders of the highest integrity and reputation are selected to become Butler Builders. They will work with your committee to provide the building system you want, on time and within your budget.
